To Whom It May Concern:

I am currently looking for a 4-month summer position where I can explore more areas of the industry and learn and grow from other experienced developers. As well, I'm seeking for something challenging to push me to improve and refine my current abilities. I am relentless when it comes to completing a challenge, and as a result I am quite intuitive and resourceful all of which makes me a fast learner.

I am currently completing my third year at University of Guelph working towards a Bachelor of Computing Honours degree, majoring in Computer Science. Through my previous work and academic experience, I am comfortable programming in web development languages and frameworks, with most of my experience in using TypeScript alongside Angular. I also have a lot of experience working with C, and C#. Using these skills, I have been able to work on several different academic personal projects including: a Google integrated Client Relationship Management system, a personal resume/blog website, an administrative and music bot for Discord, and plenty more.

It would be a pleasure to have the opportunity to meet about working with your company, and I'm sure with my abilities and personality that I can be a valuable and enjoyable addition to your team.

Sincerely,

Kyle Monteiro

SKILLS

AngularJs/Angular
TypeScript
JavaScript
C/C++
Node.js
Java
HTML/CSS

COURSES

Digital Systems

Algorithms

Operating Systems

Object Oriented
Programming

Software System
Development and
Integration

Data Structures

Intro to Legacy
Systems

Discrete Structures
in Computing II

Structures and
Applications of
Microprocessors

Technical Experience

FRONT-END DEVELOPER

PerkinElmer Inc. • September 2019 – December 2019

- Worked on refactoring and migrating code from AngularJs controllers to Angular components
- Responsible for the resolution of front-end issues and development
- Collaborated with the UI/UX Design team to eliminate low hanging fruit and other inconsistencies within the application.

SOFTWARE DEVELOPER

The Dexterity Group • September 2016 – August 2018

- Developed a Client Relationship Management system integrated into the Google Suite of applications as a Google Sheets Add On using HTML, JavaScript, and CSS
- Collected and implemented requirements from client for specifications of the utility
- Designed and created a web page for the order form and landing page for prospective customers

Education

BACHELOR OF COMPUTING, COMPUTER SCIENCE, HONOURS (CO-OP)

University of Guelph • 2017 – Present

- Pursuing a Minor in Marketing
- Completed 10.25 credits including: Software System Development & Integration, Data Structures, and Discrete Structures in Computing
- Currently in third year of program

Work Experience

SALES ASSOCIATE

Sporting Life • September 2015 – December 2017

- Utilized strong communications skills in order to work seamless with team members and meet sales commissions goals and customer service standards

Extra-Curricular

- Competed in Code/Design to Win Challenge 2019 hosted by Communitech
- Member of Society of Computing and Information Science (SOCIS) at University of Guelph
